EXPERIENCE

M2P Fintech - Technical Lead

Bengaluru, India

Technology Stack: Java, Angular, SQL, Spring, DevOps, AWS

December 2022 - Now

- **Leading a 10-member team** developing a Loan Origination System (LOS) for banks and NBFCs.
- Migrated infrastructure from unmanaged AWS to Helm, Argo CD, Kubernetes based Declarative GitOps, thus streamlining deployment processes and ensuring system reliability.
- Engineered a client-customizable feature for rapid form creation, significantly reducing time to market and gaining widespread client adoption.
- Designed and implemented a multi-tenancy architecture, enabling efficient resource utilisation and cost savings across different client environments.

AnalyticsVerse - Full Stack Developer & Co-Founding Member

Bengaluru, India

Technology Stack: Java, Angular, Spring, SQL, Terraform, AWS Cloud

January 2022 - October 2022

- Directly impacted conversion of prospects to paying customers by ideating, designing and implementing several key features like allowing users to create custom dashboards by picking metrics of their choice, a demo mode which allows users to view the product interactively without any hassle of adding integrations and so on.
- **Reduced cloud infrastructure cost by 10x** by optimising various batch jobs and cloud components.
- Took ownership and worked on all aspects of the product, including UI Design, Frontend, Web APIs, Batch Processing, Cloud Infrastructure development.

Morgan Stanley - Software Engineering Manager

Mumbai, India

Technology Stack: Angular, .Net, Java, Tableau, and SQL

August 2018 - December 2021

- Led a reporting and visualisation project, from the technical front, which involved creating a framework for integrating Tableau Dashboard with proprietary software.
- Reduced cost and increased scalability of the above system by coming up with an alternative system architecture.
- Received an email of appreciation from **Bjarne Stroustrup (Inventor of C++)** for making a SaaS app, as part of our 'Giving Back' initiative at the firm, which helped an NGO with their vaccination drive.
- Mentored summer interns for three consecutive years, within as well as outside my team.

Morgan Stanley - Summer Analyst (Intern)

Mumbai, India

Technology Stack: Angular, HTML, CSS, SQL

May 2017 - July 2017

- Successfully completed a System Monitoring and Workflow Automation project for the Data Engineering team.
- Developed REST APIs and UI pages to fulfil diverse feature needs.

SKILLS

Languages: Java, JavaScript, TypeScript, HTML, CSS, C, Python, C#, C++, Scala, SQL

Miscellaneous: Angular, Git, DevOps, Tableau, Redis, NoSQL, Spring Boot, Spring Batch, Agile, Jira, AWS, Photoshop

Domains: Web Development, Product Design, Data Visualization, Robotics, Leadership & Management, Image Processing

PERSONAL PROJECTS

Dijkstra's Robot

Developed a line-following robot employing **Dijkstra's algorithm** to find the shortest path in a grid maze. Utilised Depth First Search for maze exploration, enabling efficient pathfinding from source to destination in subsequent runs.

Game Development

Developed single and multiplayer 2D games including **PacMan, Snake**, Ping Pong, Airship Combat in Java and Python.

Poetic Musings

Designed and developed a poetry website which has a user interface similar to a music player like **Spotify**. It was created in Angular and made responsive for all screen sizes without using any CSS libraries.

EDUCATION

Veermata Jijabai Technological Institute

Mumbai, India

Bachelor of Technology in Computer Engineering - CGPA 8.1/10

August 2014 – June 2018
